

Cable protection tube – type S

Material:

- protection tube with integrated steel wire
- sheath: PVC

Temperature range:

-20 °C up to +80 °C

Protection type:

IP 67 according to DIN 40050

Highly resistant to:

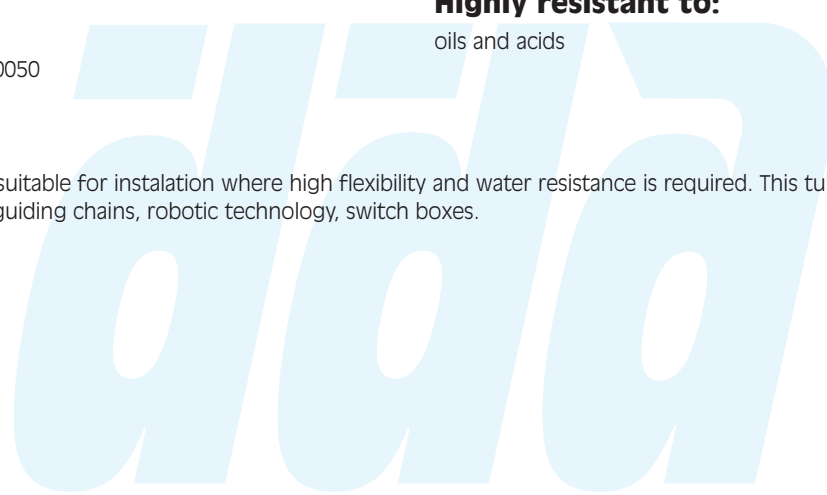

oils and acids

Application:

Protection cable tube is suitable for installation where high flexibility and water resistance is required. This tube is suitable for wet and outdoor environments, guiding chains, robotic technology, switch boxes.

Note:

Technical changes reserved.
Further types on request.
